Building Description _____ Square Footage _____

BaySystems North America LLC, (BSNA) warrants that the BSNA spray polyurethane foam, (SPF) applied on the above referenced building will not blow off due to high winds, up to and including Category V hurricanes.

This warranty does not cover:

1. Any consequential damages including damage to the underlying deck, walls, mansards, roof penetrations, roof mounted equipment, abandoned equipment curbs, antennas, satellite dishes, lightning protection systems, security cameras, security lighting or to the interior of the building.
2. Damage caused by intense storm surge pressure or other storm related conditions other than high wind.
3. Damage caused by flying objects and debris.
4. Wind blow off of underlying construction material including parts of the building, roofing assembly, or any non spf material including residual flashings or membrane remaining from previous roofing applications.

Remedy: Should areas of the spray polyurethane foam be removed due to high winds, BSNA's responsibility will be to replace the effected area with new SPF, coatings and granules where applicable.

BaySystems North America's sole liability under this warranty is limited to replacement of BSNA materials that suffer blow off. No other guarantee is offered or suggested by this document or is offered by any of our contractors or representatives without the expressed written permission of BaySystems. Other warranties from BSNA or 3rd parties may be in place covering leaks.
